

Quality Engineer

Job Description:

Millstone Medical Outsourcing is looking for an energetic individual to join its Quality Engineering Department. We are a fast growing, fast paced medical service provider for some of the top Orthopedic companies in the industry. Millstone's business focus is sterile and non-sterile packaging of medical devices. Millstone also engages in other activities, such as mechanical inspection and assembly, which are designed to meet the outsourcing requirements of medical device manufacturers seeking to reduce costs while maintaining high levels of quality, accuracy and timeliness. We are FDA and ISO registered and employ a detailed internal quality system to ensure ISO compliance.

Millstone is presently looking for a Quality Engineer with technical writing skills to develop client process validations, such as ultrasonic cleaning, sterilization, and sterile packaging. This individual will also be responsible for the execution of validations throughout the process, both internally and at the outside testing labs. Candidates will also be expected to provide quality support for operations and communicate with Program Managers and clients to fulfill expectations.

Skills Required:

Candidates must have excellent organization and communication skills. Attention to detail is a must. A Bachelor's degree and several years of relevant work experience with technical writing is required. Candidates must have experience using Microsoft Word and Excel.

Contact:

Interested individuals should send resumes to hr@millstonemedical.com or apply in person at 580 Commerce Drive, Fall River, MA.
