**FOR IMMEDIATE RELEASE**

**Millstone Medical Outsourcing Completes Clean Room Facility Expansion**

***Industry partner of choice expands footprint 33% to 20,000 ft<sup>2</sup> to accommodate rapid growth***

Fall River, MA, March 20, 2023 – Millstone Medical Outsourcing, the industry’s leading partner of choice for medical manufacturers’ post-manufacturing and aftermarket services, announces the completion of its cleanroom space expansion. The facility expansion began in Fall 2022 and added 5,000 square feet of Class 10,000/ISO7-rated cleanroom space for medical device packaging operations, bringing Millstone’s total cleanroom footprint to 20,000 square feet.

**Staying ahead of growth**

The 2022-2023 cleanroom expansion is the third planned expansion in Millstone’s company history, undertaken in response to increased demand for cleanroom packaging and assembly services with expert support. “As demand rises for sterile packaging and cleanroom packaging services, we have expanded our footprint and added equipment and staff to support greater capacity,” **Millstone General Manager Tom Williams** said. Williams pointed to key growth factors including European Union Medical Device Regulation (EU MDR) compliance and higher demand for Millstone’s comprehensive Tier 1 services for OEMs. Through Tier 1, Millstone supports OEMs with end-to-end service from quality critical inspection through cleanroom packaging and assembly.

“Millstone has always been a high-growth company. With this latest expansion, we have strategically invested to stay ahead of the growth curve to continue to serve orthopedic and other medtech OEMs as a single expert point of contact for their post-manufacturing and aftermarket services,” Williams stated.

The completed cleanroom expansion follows a significant expansion in 2020 for the company’s Headquarter Campus in Fall River, MA. The expansion added 60,000 square feet of state-of-the-art warehouse and office space, bringing the campus footprint to 124,000 square feet. In addition to cutting-edge cleanroom equipment, Millstone’s facility includes multiple industry-leading high purity water systems.

Momentum for Millstone also includes the recent launch of **Millstone Testing Services** to offer comprehensive product, packaging, and environmental testing for the medical device and pharmaceutical industries. Millstone Testing Services launched in December 2022 after the acquisition of two ISO 13485:2016 certified contract testing organizations, Ethide Labs and MycoScience. The acquisition brought 90 years of experience in advanced laboratory and environmental testing and expanded support for Millstone customers.

**About Millstone Medical Outsourcing**
